- It is a violation to drop off refrigerators, electronics, televisions, computers, concrete or dehumidifiers at any time.

**Mulching and Compost Pile**

**Grass Clippings- Mulch, Do Not Bag** – It is much better for your lawn and the environment. See Back Residents are encouraged to create their own compost pile near their garden or in a back corner of their lot. It's easy to do. Just form a pile with grass clippings and garden waste. Turn the pile once per month and water if it gets too dry. The natural process will take over and in a year you have great topsoil for flowers beds and gardens.
